📊 The model expects 16 inputs

ℹ️ How to Use

To avoid input mismatch issues:

1. **Correct number**: 16 inputs
2. **Correct order**: Must match training data
3. **Correct encoding**: Convert text to numeric values

Required Inputs:

- Age, Balance, Day, Duration
- Campaign, Pdays, Previous contacts
- Job, Marital status, Education
- Default, Housing loan, Personal loan
- Contact type, Month, Previous outcome
